VoIP Designed, Built, and Delivered by the Asterisk Company

Digium has been stewarding the Asterisk project for more than a decade and now brings high quality, cost effective SIP trunking to your Asterisk server, Switchvox, or virtually any IP PBX. Digium SIP trunks are not only delivered by Digium, the Asterisk Company, but they are also backed by the same support staff that supports Asterisk, Switchvox, and Digium IP phones. Now you need only one place to go for support.

Save Money on Your Monthly Phone Bill in Minutes

Reduce your telephony costs in minutes and deliver a higher standard of service to your business by replacing traditional phone lines with Digium SIP Trunking. Save thousands off your phone bill with lower rates for local and long distance, and simplify your communications into a single data connection. Instantly see how much SIP trunking can save your business with our online quoting tool, the **SIP Trunking Configurator**. When you're ready to get started, sign up with a click of a button and *start making calls in minutes*.

Pay Only For What You Use

Many companies today use costly PRIs or T1 connections, which provide you with 23 or 24 channels whether you need them or not. With flexible rate plans, Digium SIP Trunking allows your company to pay only for the minutes or channels you need.

The **Metered Plan** is great for a company that needs flexibility in their communications due to seasonality, changes in staffing levels, or variable call volume. The Metered Plan allows you to only pay for the minutes you use in any given month.

The **Per Channel Plan** is perfect for companies that want predictable expenses. With the Per Channel Plan, you pick how many channels (or concurrent calls) you need and pay a set price every month. No need to worry about the number of minutes used – each channel includes unlimited minutes!
